Say Something

[Mike Gordon](#)

I get affected
You make a sound and you mute me
I get rejected
When you move about and you lose me
Tongue tied
I can hardly get myself to
Say Something
Gotta say it in morse code
Gotta sing it on the radio
Say Something
Gotta get loose
I'm finding nothing
When I cruise the other side
Then I find you jumping
Out on the alleycat sidewalk so high
My, you fall so gracefully
Just gaze my way and
Say Something
Gotta say it in morse code
Gotta sing it on the radio
Say Something
And we can finally get loose sometime
Gotta get high just to testify
Just when you get a little impulse to
Almost start vibrations on the inside of your throat
Someone has to make an interruption
They tap into a hydrant, spray us with the hose
Let's talk about the time through dirty little streets we can roam
Park in every cul de sac and hide so we never get home
Talk is cheap anyway, words can get overblown
Let the transmission do its thing and we can swing in the drone
Say Something
Say it smoke signals,
Say it in morse code,
Slur it so the words erode
Say Something
Move it in charades
But baby there's no need to stay
Clammed up to-day
In your fifteen minutes of fame
With all the network cameras aimed
Could you just one time come up with a line

That expresses everything that you wanted to
Say Something
Say Something
