

# Lady Red Light

## Great White

Deep in the night alone in the dark  
I get a need for you  
In a hotel room I remember the way  
How we do what we do Too long without your touch  
Too long without your love  
My lady of lights  
I'm coming over for you I call you lover  
I call you friend  
But when I need another  
She's got a heart, a heart to lend  
Lady red light, rock me tonight  
Baby's got a way to make it all right  
Lady red light, rock me tonight  
She knows how to move me, lady red light  
Lady red light A shadow of night weighted in time  
Really no need to be  
Cold and alone, I've made up my mind  
Who I need to see I call you lover  
I call you friend  
But when I need another  
She's got a heart, a heart to lend Lady red light, rock me tonight  
Baby's got a way to make it all right  
Lady red light, rock me tonight  
She knows how to move me  
Lady red light, rock me tonight  
Baby's got a way and I feel all right  
Lady red light, rock me tonight  
She knows how to move me, lady red light Lady red light, rock me tonight  
Baby's got a way to make it all right  
Lady red light, rock me tonight  
She knows how to move me Lady red light, rock me tonight  
Baby's got a way to make it all right  
Lady red light, rock me tonight  
She really knows how to move me Lady red light  
Lady red light  
She knows how to move me  
She knows how to move me
