

# Science/Visions

## CHVRCHES

Breathe  
Don't speak  
It's leaving your body now Slow heart  
Set free  
A circuit of consciousness When you were truly yourself  
You will  
Succumb to a permanence A light  
By day  
A shadow resides by night I (I)  
Hear (hear)  
Your (your)  
Breathing  
I (I)  
Feel (feel)  
You (you)  
Leaving With understanding  
You won't let it cast you down  
A mind full of questions  
A current to purify  
Science and vision  
Be near when I call your name  
Or ask me a question I (I)  
Hear (hear)  
Your (your)  
Breathing Breathe  
Don't speak  
It's leaving your body now  
I (I)  
Feel (feel)  
You (you)  
Leaving Heart  
Set free  
A circuit of consciousness I (I)  
Hear (hear)  
Your (your)  
Breathing Light  
By day  
A shadow resides by night I (I)  
Feel (feel)  
You (you)  
Leaving With understanding  
You won't let it cast you down

A mind full of questions  
A current to purify  
Science and vision  
Be near when I call your name  
A mind full of questions  
A current to purify  
Science and vision  
Be near when I call your name  
Or ask me a question
