

Medicinal Reality

From First to Last

This is your day with a whole world to face
What is your price to appease
You can march to the beat that puts us to sleep
Medicinal reality All my life
I've been searching for hope to find
Something more than just
Pawns in a chess game
And blood stained names
Just fall in line
Fall in line Can you feel the weight of two decades to date
All crashing down on you now
You can march to the beat that puts us to sleep
Medicinal reality
All my life
I've been searching for hope to find
Something more than just
Pawns in a chess game
And blood stained names
Just fall in line
Fall in line Free from the womb with only a name
Make something of yourself
Before you made a slave
Cause life will not wait
No life will not wait
The sun's gonna rise either way You can march to the beat that puts us to sleep
Medicinal reality
All my life
I've been searching for hope to find
Something more than just
Pawns in a chess game
And blood stained names
Just fall in line
Fall in line All my life
I've been searching for hope to find
Something more than just
Pawns in a chess game
And blood stained names
Just fall in line
Fall in line
