

In Your Fur

Teleman

I am a walking tower of silence
Haven't I got some place to be
Pushing your friends aside you just move on
Can't tell if you're dancing just for me We stop so far from many station
And its so still and dark outside
Where've you been while I was sleeping
On the strangest ride Couldn't you grow a pair of wings now
Pushing yourself above the roof
Couldn't you be my new relation
You and your fur and leather boots
We stop so far from many station
And its so still and dark outside
Where've you been while I was sleeping
On the strangest ride I've been trying to lift your heavy feeling
Tic-ticking along like an old machine
Cover the front and drive with the driver
Shovelling coal to make the steam
We stop so far from many station
And its so still and dark outside
Where've you been while I was sleeping
On the strangest ride On the strangest ride
On the strangest ride
On the strangest ride
