

Universe

Mohombi

Like the first man to walk the moon
Every breath with you feels brand new
Just as sure as the sky is blue
You make it alright, alright

(Pre-)

Doesn't matter if we came from nothing
Wouldn't matter if we didn't have a dollar
Cause you always seem to give me something
To make it alright, alright

()

But I won't give you the world, world
Won't give you the world, I give you my universe
Now we've fallen in love, I promise you girl
I give you my universe
Let's run into the sun, there's a sea full of stars
So I won't give you the world, I give you my universe
