

Starlight

Flux Pavilion

We could be starlight when the world won't turn for no one
Circle the spotlights when you ain't got nothing to prove
We could be starlightWe could be starlight
We could be starlightWe could be starlight when the world won't turn for no one
Circle the spotlights when you ain't got nothing to prove
It spills then she appears from the earth when blind
Circle the nightlife when you ain't got nothing to loseWe could be starlight
We could be starlightWe never ever make a sound
My feet are falling on the ground
They're rising so much from the cloud
The water seems to turn so slow
We could be starlight
We could be starlight
We could be starlight
We could be starlight
