

Bright Spring Morning

Suburban Legends

The time is right, to begin
Let's get goin' once again
For once in your life just let go
I'm getting sick of everything
Tired of what the next day brings
What I need is for you to follow my lead
The sun is shining bright outside
I think I'll go for a ride
I plan not to ever return
Let's run away from here for good
Forget this dusty neighborhood
The open road is calling and begging for us
Go roll down the window
Go crank up that radio
Let's drive until we hit the sky
It's not about where we go
Let's start living life
Before we die
Before we die
If you want you can stay
But you'll regret the day
That you didn't follow your dreams
Imagine the wind in your hair
Blowing away all of your cares
So take my hand let's plan never to look back.
The sun is shining bright outside
I think I'll go for a ride
I plan not to ever return
Let's run away from here for good
Forget this dusty neighborhood
The open road is calling and begging for us
Go roll down the window
Go crank up that radio
Let's drive until we hit the sky
It's not about where we go
Let's start living life
Before we die
True, it's all in my dreams
Yeah
You are all in my dreams
Yeah
What I need is a long holiday
What I need is a long holiday
What I need is a long holiday
What I need is to get away
From here for good tonight
Let's fly away tonight
On this bright spring morning

Send our spirits soaring
Now is the time
Go roll down the window
Go crank up that radio
Lets drive until we hit the sky
It's not about where we go
Lets start living life before we die
