

Open Fire (feat. Daniel Johns)

SLUMBERJACK

We're a long way
From the cold nights
And that old place we found love
And I've been so caught up
In the moment we got lost
And it all changed
When the spotlight came my way
That led to another
Then you're gone
Open fire
Stranded over now where I lost you
Hoping to find
Where did it all go wrong?
Do you know?
Do you know?
Do you know?
Do you know?
Do you know?
Open fire
Stranded over now where I lost you
Hoping to find
Where did it all go wrong?
Do you know?
Was it always in your mind
Were you ok all along?
Did I make some of the? that you were going
It's my fault
But it all changed
When the spotlight came my way
What could have told me
Right in the moment
What you waiting for?
Open fire
Stranded over now where I lost you
Hoping to find
Where did it all go wrong?
Open fire
Stranded over now where I lost you
Hoping to find
Where did it all go wrong?
Ooo
Open fire

Stranded over now where I lost you
Hoping to find
Where did it all go wrong?
Ooo
Do you know?
Do you know?
Do you know?
Do you know?
