When your time comes and you're numbers up

All you have in life is what's left in your cup

When the whistle blows and the party's over

Don't let em drag you out bored and sober

When what's done is done and what said is said

And the dreams you've had are lying in your bed

Let your memories be filled with no regrets

There's no second chance, there's no turning back so.Every time I close my eyes I start to drift
away- thinkin bout some days gone by how time just

Floats away- every time I hear that song puts a smile on my face- brings me back to good
friends

And times that money cant replace
