

Son of Robot

Dance Gavin Dance

How, how could we forget about you
The summoner, the centerfold, successor to the brood
Of all the iterations yeah you're the sickest dude
Fighting cow, how could we forget about you Say you don't hate me for nothing
Hate me for falling out of reach
Hate me for something Never knew that you could be so lonely, lonely
Running out of feelings so pretend you can be lonely, lonely
Stuck in your mind Can't let it go
What hurts you the most
Is I wasn't there to beg you
"Baby don't go"
Put on a show
Light it up
Light it up No, it's not a phase
It's the way that she combs my hair
Never wake
Never wake from this coma How, how could we forget about you
The summoner, the centerfold, successor to the brood
Of all the iterations yeah you're the sickest dude
Fighting cow, how could we forget about you Light it up for us
Show me the way you're growing
Your catharsis is beautiful
I wish I could be you Show up at the ball with your doo doo faced babe
The robot with human hair is dead but gets laid
That's why he's got all these kids on the way
His son's a girl named baby swirl that loves to swing his blade
Can't let it go
What hurts you the most
Is I wasn't there to beg you
"Baby don't go"
Put on a show Light it up
Light it up No, it's not a phase
It's the way that she combs my hair
Never wake
Never wake from this coma Light it up for us
Show me the way you're growing
Your catharsis is beautiful
Brighter
How I wish I could touch you
Feel you, breathe you, be just like you
