

# Fool the World

## Drake Bell

Right in front of me  
A couple makes what could melt the snow  
Making fun of me  
A single look never cut me so And I go  
To save the conversation  
I know  
A deeper contemplation  
Is all I need to make believe  
Everyone would love me if I could fool the world Walk away from me  
I see the change in the atmosphere  
What a way to be  
To turn the page  
Just to make it clear  
And I go  
To change the conversation  
I know  
A deeper contemplation  
Is all I need to make believe  
Everyone would love me if I could fool the world To fear  
Or to disappear  
What a waste a time  
What a troubled mind  
A fortune find for another day  
As you're passing by  
You look behind to see what I would say And I go  
To change the conversation  
I know  
A deeper contemplation  
Is all I need to make believe  
Everyone would love me  
So I go  
To change the conversation  
I know  
A deep contemplation  
Is all I need to make believe  
Everyone would love me  
If I could fool  
The world Ladies and gentlemen! I can't survive another day in the life  
Without a day in the sun  
Before you touch me  
Here's a word of advice  
If I were you I would

Come get it

Come get it

Come get it

So won't you tell me why That every corner of my head is a home

But every fool is the same

It'd be so tragic if you left me alone

But left me no one to blame Well don't it make you wonder what got us here

The covers that were under could disappear

Promises keep us in chains my dear

What am I feeling

(if I could fool the world

then no one would know where I've been)

What am I feeling

(if I could fool the world then no one)
