

# Learn to Trust

## Bad Suns

Can I hold it down?  
Have I been trying my best?  
Eternal questions always asking,  
feeling distressed, oh  
I've been ticking more than time, a selfish man  
You're a casualty I can't forget so come on and let me go  
A heart glows in the night,  
in the day hearts turn to dust  
Say it and mean it,  
so this heart learns to trust  
Can I change my ways?  
Can I confront the past?  
Eternal questions always asking,  
failing the test, oh  
I've been ticking more than time,  
a selfish man  
You're a casualty I can't forget  
so come on and let me go  
A heart glows in the night,  
in the day hearts turn to dust  
Say it and mean it,  
so this heart learns to trust  
And the truth it makes no sense  
my senses don't ring true  
I'm feeling the pressure distorting you  
Tell me we're both done, why should I listen?  
Tell me we're both done, the words all go missing  
Hold it down, have I been trying my best?  
Eternal questions always asking,  
feeling distressed, oh  
So come on and let me know  
A heart glows in the night  
in the day hearts turn to dust  
Say it and mean it  
so this heart learns to trust  
A heart glows in the night  
in the day hearts turn to dust  
Say it and mean it  
so this heart learns to trust
