

# Transpose

## Bad Suns

Sleepless nights aren't new to me  
All these thoughts are killing me  
Someone come and put me to ease  
All of my anxiety  
There's no cause that I can see  
What's this scratching at my brain? And I can't stop, even if I wanted to  
Up top, maybe I'm simply deluded  
That's right, maybe I've been wasting my time  
All my time  
and it's hard to justify what you can do  
I'm so sick and tired of falling through  
and it's true, maybe I've been wasting my time  
All this time  
Come creeping, no one can hear you now  
Listen, so you can show me how  
Something, that I'm missing here  
Softly, stab my evil dreams  
Faster, help me fall asleep  
No one knows, that's how it goes  
All the thoughts that we transpose And I can't stop, even if I wanted to  
Up top, maybe I'm simply deluded  
That's right, maybe I've been wasting my time  
All my time  
and it's hard to justify what you can do  
I'm so sick and tired of falling through  
and it's true, maybe I've been wasting my time  
All this time  
From time to time, we fall in line  
But now it seems that we are blind  
No one knows, that's how it goes  
All the thoughts that we transpose
