

Together (feat. Newtimers) [Extended Mix]

Cazzette

If i'm gonna stay here for the night
Would you let me stay untill the morning?
Wake up by your side and love you right again.
If I'm gonna stay here for the night
Would you let me stay untill the morning?
Crawl under your skin and love you right again!!
I had to take it slow
With you, my darling
I'm counting, would you give me ecstatic
It's magic.
With you I lose control
It's you my darling
Can't stop you
When I am the one who made it
You count it
If I'm gonna stay here for the night
Would you let me stay untill the morning?
Wake up by your side and love you right again
If I'm gonna stay here for the night
Would you let me stay untill the morning?
Crawl unto your skin and love you right again!!
If I'm gonna stay here for the night for the night
Would you let me stay untill the morning?
(morning)
Wake up by your side and love you right again
Wake up by your side and love you right again
If I'm gonna stay here for the night
Would you let me stay untill the morning?
(Mooooorning)
Crawl unto your skin and love you right again.
Wake up by your side and love you right, right, right, right.
If I'm gonna stay here for the night
Would you let me stay untill the morning?
Wake up by your side and love you right again
Wake up by your side and love you right, right, right, right.
