

Speak In Tongues

Ferras

Everything's different
Something's gon' missing
Travel the distance to drown on the sound of the noise we make
We talk the same shit
Expecting to shake shift
But we just dump shit,
Can't swim in the wreckage of what we saved
How do we get to the naked truth
Cause I got nothing if I don't got you
What have I got
What have I got
What if we've got nothing else to lose
The only thing left for us to do
It's turn the lights out
No more words
I wanna speak in tongues
No more words
Talk to me with your touch
Body vibration is not hard to hide
No conversations are good place to start
No more words
I wanna speak in tongues
You never listen
And I play the victim
Why don't we shut up
Come undone, and change who we both become
I buy you weapons
You put up resistance
Even one of us spending, we're in this
And end up just enemies
How do we get to the naked truth
Cause I got nothing if I don't got you
What have I got
What have I got
What if we've got nothing else to lose
The only thing left for us to do
It's turn the lights out
No more words
I wanna speak in tongues
No more words
Talk to me with your touch
Body vibration is not hard to hide
No conversations are good place to start
No more words
I wanna speak in tongues
In a better silence

I do need you
And the voice still lasts
I'm gonna still you
Feel you
And turn the lights out I wanna speak in tongues
No more words
Talk to me with your touch
Body vibration is not hard to hide
No conversations are good place to start
No more words
I wanna speak in tongues
