

# Bassment Party

## The Cool Kids

They say if you ain't got no money take yo broke ass home  
I say if you got your two dollars, then come through to my party  
But get bent before you come 'cause for that liquor I'll be charging  
And take down these directions  
It's right past that intersection  
Make a right at the light  
It's the first house on the left  
And get it, got it good  
You made it, I knew you would  
We got them drinks up in the back and them chickies looking good  
Hold up, here come one ayy what's yo name hun?  
Jackie brown, yea that pop  
Ayy I'm chuck, this mikey rocks  
And let me introduce you to some kids that you ain't used to  
Yep we bet that we ride bikes  
Carrying bones and jordan 5's  
Got every single color so  
Just in case you wonder  
My party's is always live  
As a mother is for supper and  
In the summer when it's hotter then the oven  
We the coolest kids we know  
So you know we into something  
That involve doing something  
With a trunk to get that bass drum pumping  
It's my party, so get up  
If you don't you getting jumped  
What's happening?  
Where's the party?  
Say you heard me say there's a party  
Right around my way  
So if you finna start it  
Then don't do nothing small  
Get everyone involved and  
Say that it's a party  
What's happening?  
Where's the party?  
Say you heard me say there's a party  
Right around my way  
So if you finna start it  
Then don't do nothing small  
Get everyone involved and

Say that it's a party  
One to the two  
Three to the four  
Chucky and mike is at yo door  
We don't knock  
We straight on that  
"when yo album drop"  
You can wait on that  
I don't don't like the questions you ask so  
Let me tell you a little about myself  
Everywhere I go I act an ass  
And if you ain't know  
Better go and ask  
At every party  
I hop the bar  
And then dance with the chicks  
On top of that  
Bartender be like, get off of that  
I'm like not till I get rich off of rap  
And I look to the left, she dipping her hips  
And making her lips, at me I guess  
And I look to the left and look to the right  
Point to my chest and she was like "that's right"  
Now let me tell you the recipe  
To all you niggas tryna get like me  
It takes a scoop of being cool  
And the rest will be included  
When you purchase my movie  
Cause if you knew what I knew  
You would prolly try to  
Do whatever I do  
Prolly move to chicago  
If you want instructions  
Then I could prolly front them  
Just as long as you shortys pay attention  
So if you ugly keep you hands by yo side  
But if you not then put em' in the sky  
And if you knowin' what it is  
There's a party at the crib  
Come and party with the kids  
What's happening?  
Where's the party?  
Say you heard me say there's a party  
Right around my way  
So if you finna start it  
Then don't do nothing small  
Get everyone involved and  
Say that it's a party  
What's happening?

Where's the party?  
Say you heard me say there's a party  
Right around my way  
So if you finna start it  
Then don't do nothing small  
Get everyone involved and  
Say that it's a party
