

# Little People

## Todrick Hall

You got that 'It' thing  
No, you're never gonna quit thing  
I know you're gonna make it someday  
(I know you're gonna make it someday) You're gonna go far, kid  
Go follow your heart, kid  
But don't you dare forget where you came  
(Don't you dare forget we're right there) Impossible for us to love you harder (right there)  
But don't you dare forget your alma mater (right there)  
Until you're on our television screen  
So go spread your wings  
And we'll do big things  
And where this old brick road is gonna lead  
I just don't know  
When you're gone, be strong  
Just promise me wherever you go  
Don't forget the little people  
Always there to cheer you on  
Don't forget that they're your equal  
Don't forget, don't forget the little  
The little people (don't forget)  
The little people (don't forget)  
The little people  
Don't you dare forget the little people  
You're right on track now  
Never gonna look back now  
You've got a lot of just what it takes  
(You've got a lot of just what it takes)  
I'm feelin' free now  
Think I'm gonna do me now  
I know this road is full of mistakes  
(But don't you dare forget we're right there) Impossible for me to love you harder (right there)  
And I'll never forget my alma mater (right there)  
'Til you're the talk of all the magazines  
We'll be on your team  
So go chase your dreams  
And where this old brick road is gonna lead  
I just don't know  
When you're gone, be strong  
Just promise me wherever you go  
Don't forget the little people  
Always there to cheer you on  
Don't forget that they're your equal

Don't forget, don't forget the little  
The little people (don't forget)  
The little people (don't forget)  
The little people  
Don't you dare forget the little people(Oh, oh, oh) all the little people  
(Oh, oh, oh) all the little people  
(Oh, oh, oh) all the little people  
Don't forget, don't forget  
No, don't you dare forget the little people
