

This Is That

David Byrne

When the song comes on, when I hear them say
Everything stops, everything changes
It's nothing special now, it's nothing profound
But something about the way it sounds
When the melody ends, and the, the rythm kicks in
It knows where I'm at and it knows where I've been
WellThat's when I call you up
That's when my river overflows
That's when I use my cash card
That's when I think of who you are
That's when there's a knock at the door, and
That's what we're doing it for, well
That's when I got your message
That's when I sing this song
That's when he says it's over
That's when my life is in your hands, nowThat's when I call you up
That's when my river overflows
That's when I use my cash card
That's when I think of who you areThis is when, this is now
This is that, this is how
This is what, this is then
This is when
This is when, this is now
This is that, this is how
This is what, this is then
This is when, this is when
