

# Get Into It (feat. Loreen) [Radio Edit]

## Boston Bun

You and me  
We shouldn't have it won for now  
See, I believed  
That you believed in me  
But I guess there wasn't enough  
Nothing left for us to discuss  
You see  
I may have set you free  
They're going let us get into it  
Forget about the rest when you do it  
The best is when you do it to me  
Our lies spoke the truth in the night you met your dimension  
You fall into my trap  
And you can't find the way anymore  
They're going let us get into it  
Forget about the rest when you do it  
The best is when you do it to me  
Our lies spoke the truth in the night you met your dimension  
You fall into my trap  
And you can't find the way anymore  
There you are  
Look in the way like you don't care  
I can tell  
She's more than just a friend  
We can do it til we both get enough  
Nothing left for us to discuss  
You see  
I'm here to set you free
