

When Goodbye Was a Word

[Trisha Yearwood](#)

(Paul Nelson - Gene Nelson) Stars would shine on stormy nights
Flowers grew in winter time
Everything seemed possible
When we were in love. When forever was
What other people lost
This lonesome valley was
What other people crossed.
No. I couldn't taste
The tears other people shed
When goodbye was
A word other people said. --- Instrumental --- Rivers flowed,
A bridge would burn
And nights would end
The earth still turns. Yesterday is just
A song to sing
In the world we knew. When forever was
What other people lost
This lonesome valley was
What other people crossed.
No. I couldn't taste
The tears other people shed
When goodbye was
A word other people said. When goodbye was
A word other people said...
