

Everything We Touch

Say Lou Lou

I lived inside the hidden bay,
And time used to pass so slow
I raised dragons by my side,
But I, I had to let them goooDays of ashes and nights of flames
A thirstful beauty then thirstful games
Do you need to seal my soul,
Just let me know
When you get out!Everything we touch turns to gold at night
In the dark we make it special, make it justified
Everything we touch turns to gold at night
There's a ghost of another she, and there's a lower light
Now there's a black star on my sun,
I can't make it go away
Asking what I chose wasting my time
Until I knew your
Days of ashes and nights of flames
A thirstful beauty then thirstful games
Do you need to seal my soul,
Just let me know
When you get outEverything we touch turns to gold at night
In the dark we make it special, make it justified
Everything we touch turns to gold at night
There's a ghost of another she, and there's a lower lightWhen you get out!
Time we make it special, make it justified!
Everything we touch turns to gold at night
In the dark we make it special, make it justified
Everything we touch turns to gold at night
There's a ghost of another she, and there's a lower light
