

Denial (feat. Spencer Sotelo)

Monuments

I prevent the bullshit lies
Never thinking for a second that death could be the fall of me
It's a long way down for us
And now they sit
On a cloud drinking the pot of human wreckage all alone
We see it,
Ritual mind control But I am basking in the crimson,
Illuminating filth of the Earth
I feel like we will never feel
Destruction is the one that I obey
Dysfunctional is nothing new
Believe me when I'm told there's no comforting answers
I feel like we should never feel
Confusion is a part of every day
I'm tired of being so afraid
They're poisoning the brew (beauty?) of our despair
We should stop lying to ourselves
We are the virus
And there's no guarantees of our survival
We're living in denial
Crash it all
Should we fail and cope with reality?
Anti-social behavior is the new crown
We're fighting back, it's the start of the first war
It's the start of a war We should stop lying to ourselves
We are the virus
And there's no guarantees of our survival
Displace false thinking
What is it?
Living in denial
Crash it all
We dig then outrage
Or time will break us all
Gotta do it quick, there's a new law
Belies basking in the crimson,
Illuminating filth of the earth
I feel like we will never feel
Destruction is the one that I obey
Dysfunctional is nothing new
Believe me when I'm told there's no comforting answers
I feel like we should never feel
Confusion is a part of every day

I'm tired of being so afraid
They're poisoning the brew (beauty?) of our despair
