

Good Morning Sunshine

Aqua

Ohh, oh, oh, oh
Yeah
Ohh, oh, oh, oh
Ahh, ahh, ah When the sun is up
On the clear blue sky
You will act like a lover When the sky is gray
And the rain comes down
You will run for cover Feel the heat
Come out of cold
And your arm is touching me
Good morning sunshine
You're my only light
Lyn' with me by my side
You keep me warm all day
Jus' stay with me Good morning sunshine
Be with me all day
Jus' don't let the rain pass you by
When it's cloudy or windy
And the snowflakes arrive
You somehow just make me
Make me feel I'm alive When you leave my field
Then you light the stars
Fadin' away in horizon There's a million streets
Leading off the night
Waiting for sun to be risen
Feel the heat
Come out of cold
And your arm is touchin' me Good morning sunshine
You're my only light
Lyn' with me by my side
You keep me warm all day
Jus' stay with me Good morning sunshine
Be with me all day
Jus' don't let the rain pass you by
When it's cloudy or windy
And the snowflakes arrive
You somehow just make me
Make me feel I'm alive Hold it right there
Let me take a minute of your time
To explain how I feel through these rhymes
I do the best I can and believe me if I could
I'll build you a paradise with these two hands

The top of your skin make my body go numb
I'm thinking to myself, if my dream come true
Or is it 'cause you never
Give me a chance to tell you how I feel?
The moments we had were too precious to kill
When it is cloudy or windy
Please turn your face at me
Good morning sunshine
You are my only light
Lying with me by my side
You keep me warm all day
Just stay with me
Good morning sunshine
Be with me all day
Just don't let the rain pass you by
When it's cloudy or windy
And the snowflakes arrive
You somehow just make me
Make me feel I'm alive
Ooo
Make me feel I'm alive
