

Spit In Your Face

Outbreak

you do it to yourself, and you're the one to blame
so go on ahead with your slutty game
beg for attention but i'm not buying
all i can do is laugh when i see you crying
and when you've hit the bottom and need some help up
i won't give a fuck, you'll be shit out of luck
'cause the world is overcrowded with heartless fucks
there's no one to trust and everyone sucks
i'll spit in your face and call it a day
i feel so much better without you in my way
