

# A Simple Design (Deetron Remix)

## The Juan MacLean

It takes a lot of effort  
To hold on to all your rules  
It can take years to fight movement  
It can take years off you! Out I've been good intentions  
While nothing a waiting game  
It's been 3 years of then holding the wrath,  
But holding on is something wrong Time after time, when what you're hoping to find  
Is not a SIMPLE DESIGN, but a headache  
When everything you've built comes falling down  
But if you open your mind to a slippery life  
When that's look for the time  
When that's ready  
and everything you need falls to you!  
If like to consider the measure  
Measure the risk of reward  
What makes you think they will love you?!  
They just wanna love you more  
Take up your sleep in giant  
Wake up your terracell  
They've let the path and you're well on your way  
You'll FIGHT THIS TIME Time after time, when what you're hoping to find  
Is not a SIMPLE DESIGN, but a headache  
and everything you've built comes falling down  
But if you open your mind to a slippery life  
When that's look for the time  
When that's ready,  
And everything you need falls to you!  
Falls to you, falls to you  
It's all on you  
Falls to you, falls to you ready  
It's all on you  
Falls to you, falls to you ready  
That's all on you, ready  
Falls to you, falls to you ready  
That's all on you, ready Time after time, when what you're hoping to find  
Is not a SIMPLE DESIGN, but a headache  
When everything you've built comes falling down  
But if you open your mind to a slippery life  
When that's look for the time  
When that's ready  
And everything you need falls to you
