

# Empty Bottle

Veruca Salt

Time flies and I can't keep up  
All the years I have to sweep up  
Late at night I'm in my bed and in my head  
And all the feelings start to creep up Remember how we used to dress up  
You're beautiful until you're messed up  
Take a picture cause I think we're losing light  
This is how we say goodbye  
it's how we say goodnight Banging my head against a wall of sound  
Wall like a love it brings me to the ground  
We surf the crowd, oh we will not go down  
I don't want to drown if you're not drowning with me  
Late December when we're waking  
There's an unfamiliar aching  
By the way you held my hand, held my heart  
I didn't notice it was breaking  
This is how you say goodbye  
It's how you say good night My head cracks open and the stage goes black  
I count to 60 and I meet you in the back  
I can't stop gushing, I'm a hemophiliac  
I don't wanna bleed if you're not bleeding with me We count the stars but we can't bring them  
down  
It's mistake union it's buzzing all around  
Eight more hours and I'm leaving town  
I don't wanna leave if you're not leaving with me  
I don't wanna breathe if you're not breathing with me  
Love is over, it's over and you can't go back  
When you're older, you just keep telling yourself that  
The door is open, even if it's just a tiny crack  
Up at night and wandering Love is over, it's over and you can't go back  
When you're older, you just keep telling yourself that  
The door is open, even if it's just a tiny crack  
Up at night and wandering  
Up at night and wandering
