

Light the Sky

Grace VanderWaal

Stars, they got nothing on us
I don't think you understand
Let's go out and do something we'd never do
'Cause I feel like I can do anything when My head is spinning and my feet off the ground
And I can't stop dancing like no one's around
And yeah, I think we were born to shine 'Cause the stars are dull when they're compared to you
and I
And if people don't like it, then they can close their eyes
'Cause we're not the same and we don't have to try
'Cause we're brighter than fireflies
We're gonna light the sky
Ooooh oh oh
Ooooh oh oh oh
Ooooh oh oh
Ooooh oh oh oh
Light the sky You and me, we stand out of the crowd
'Cause we aren't afraid to let our light out
So trust in me and just have no doubt
'Cause we will be tearing through the clouds 'Cause my head is spinning and my feet off the
ground
And I can't stop dancing like no one's around
And yeah, I think we were born to shine 'Cause the stars are dull when they're compared to you
and I
And if people don't like it, then they can close their eyes
'Cause we're not the same and we don't have to try
'Cause we're brighter than fireflies
We're gonna light the sky
Ooh woah oh
Ooh woah oh oh
Ooh woah oh
Ooh woah oh oh
Light the sky You and me
Me and you
We will shine through
You and me-e-e and you
We will shine 'Cause my head is spinning and my feet off the ground
And I can't stop dancing like no one's around
And yeah, I think we were born to shine 'Cause the stars are dull when they're compared to you
and I
And if people don't like it, then they can close their eyes
'Cause we're not the same and we don't have to try
'Cause we're brighter than fireflies

We're gonna light the sky Ooh woah oh
Ooh woah oh oh
Ooh woah oh
Ooh woah oh oh
Light the sky
