

Birds of Prey

Pop Evil

Some are chosen, some impressed
Some are lonely, some are blessed
Sometimes we disappear
Some build with sticks, some throw stones
Some live outside, some without homes
Some have tried to fly away Slowly stalking by design
Feeding off our own blood line
Clip the wings that fall from grace
Starve beyond without a taste We're birds of prey
Birds of prey
The weak are lead astray
To feed the birds of prey
This is peace, this is war
We found greed and we want more
This life's an open door
That stays wide open
This is hate, this is right now
We're the love we won't allow
Sometimes we gotta change, change Slowly stalking by design
Feeding off our own blood line
Clip the wings that fall from grace
Starve beyond without a taste We're birds of prey
Birds of prey
The weak are lead astray
To feed the birds of prey Whoa, whoa
Whoa, whoa
Slowly stalking by design
Feeding off our own blood line
Clip the wings that fall from grace
Starve beyond without a taste We are, we are
Birds of prey
The weak are lead astray
To feed the birds of prey
