## **Birds of Prey**

## **Pop Evil**

Some are chosen, some impressed Some are lonely, some are blessed Sometimes we disappear Some build with sticks, some throw stones Some live outside, some without homes Some have tried to fly awaySlowly stalking by design Feeding off our own blood line Clip the wings that fall from grace Starve beyond without a tasteWe're birds of prey Birds of prey The weak are lead astray To feed the birds of prey This is peace, this is war We found greed and we want more This life's an open door That stays wide open This is hate, this is right now We're the love we won't allow Sometimes we gotta change, changeSlowly stalking by design Feeding off our own blood line Clip the wings that fall from grace Starve beyond without a tasteWe're birds of prey Birds of prey The weak are lead astray To feed the birds of preyWhoa, whoa Whoa, whoa Slowly stalking by design Feeding off our own blood line Clip the wings that fall from grace Starve beyond without a tasteWe are, we are Birds of prey The weak are lead astray To feed the birds of prey
