

Good Times

Finger Eleven

Something has stuck in
Underneath my skin
Eyes all looking in
For something within
Somewhere in here Now everything I say
Gives this all away
Senses deadened again
Nothing lives today
Not in here Here in your head Careful what you're feeling
On the inside
You should try to remember
The good times and the high life
Are you feeling alright?
Felt that I belonged
And now I feel that gone
Where it all went wrong
I traced it all along
Back here again There was something calling me
To negativity
Dark covering me
Shrouding every scene
I'm cast in Careful what you're feeling
On the inside
You should try to remember
The good times and the high life
Are you feeling alright?
Careful when you're feeling
Out of your mind
You should try to remember
The strong lines in the spotlight
Till you're feeling alright Please answer
I'm calling just to find out
If you could be here
For me when I crack
The answer came
I found it buried in
The trash there
I saw it stare Careful what you're feeling
On the inside
You should try to remember
The good times and the high life
Are you feeling alright? Careful when you're feeling

Out of your mind
You should try to remember
The strong lines in the spotlight
Till you're feeling alright
