

I Love My Friends (feat. Icona Pop)

[Steve Aoki](#)

I love my friends and my friends love me
Like all the time, they're right beside me
We got each other for eternity
Like all the time, they're right beside me I love my friends and my friends love me
Like all the time, they're right beside me
We got each other for eternity
Like all the time, they're right beside me Silver and gold
When we're together
We break the mold
Yeah we make it shatter, shatter
Go where you go
Now and forever
I got your back
You got my back
I gotta tell ya
I love my friends and my friends love me
Like all the time, they're right beside me
We got each other for eternity
Like all the time, they're right beside me Send out a call
Birds of a feather
Let's show them all
Yeah we do it better, better
We're ten feet tall
Above the weather
And if we fall at least we know we fall together I love my friends and my friends love me
Like all the time, they're right beside me
I love my friends, love my friends,..
They're right beside me
Like all the time, they're right beside me
I love my friends and my friends love me
Like all the time, they're right beside me
We got each other for eternity
Like all the time, they're right beside me I know this thing we got is something special
We ain't trying to be anybody else
Not afraid to be a little different
I won't be by myself I love my friends and my friends love me
Like all the time, they're right beside me
We got each other for eternity
Like all the time, they're right beside me
