

# Lonely Day

## Phantom Planet

I could tell, from the minute I woke up  
it was gonna be a lonely lonely lonely lonely day  
Rise and shine, rub the sleep out of my eyes  
and try to tell myself I can't go back to bed  
It's gonna be a lonely lonely lonely lonely day  
Even though the sun is shining down on me  
and I should feel about as happy as can be  
I just got here, and I already want to leave  
It's gonna be a lonely lonely lonely lonely day  
It's gonna be a lonely lonely lonely lonely day  
It's gonna be a lonely lonely lonely lonely day  
Everybody knows that somethin's wrong  
but nobody knows what's goin' on  
We all sing that same old song  
When you want it all to go away  
It's shapin' up to be a lonely day  
I could tell, from the minute I woke up  
It was gonna be a lonely lonely lonely lonely day  
It was gonna be a lonely lonely lonely lonely day  
Everybody knows that somethin's wrong  
but nobody knows what's goin' on  
We all sing that same old song  
When you want it all to go away  
It's shapin' up to be a lonely day  
I could tell, from the minute I woke up  
it was gonna be a lonely lonely lonely lonely day  
It was gonna be a lonely lonely lonely lonely  
lonely lonely lonely lonely...  
Everybody knows that somethin's wrong  
but nobody knows what's goin' on  
Everybody knows that somethin's wrong  
but nobody knows what's goin' on  
(Oh oh oh ooh... why can't we see...)
