Fatalist

Front Line Assembly

It's in my head now It's in my mind now It's in my face now It's in my brain nowCity of mutants Darken then night Evil illusion Guided by lightThe friends you thought They never were Egos and icons They just don't careYou hope to die quiet Laying in bed It's better than pointing A gun to your head It's in my head now It's in my mind now It's in my face now It's in my brain nowCity of mutants Darken then night Evil illusion Guided by lightCity of mutants Darken then night Evil illusion Guided by lightAll cold and forgotten You only feel pain This quest for hope Is a losing gain Another dream crumbles In front of your eyes Your paranoid vision Only sees spiesIt's in my head now It's in my mind now It's in my face now It's in my brain nowCity of mutants Darken then night Evil illusion Guided by lightCity of mutants Darken then night Evil illusion Guided by light
