

My Friend

Hayley Williams

Little wrinkle by your eye
I never noticed 'till right now
Little vicious tiger stripes If you get close-up to my thighs
And when you're walkin' with a limp
I can remember the wolves at your heels
When my shadow barges in
You never question why she is here My friend, when the blood has dried
My friend, instant alibi
You've seen me from every side
Still down for the ride
Ooh, my friend, you know why
Not a secret I can't keep
All of your good and your evil
Well, babe, you can leave it with me
(Safe together)
If it's wrong or if it's right
I am beside you, famine or fi-ire (I-ire, I-ire, I-ire, I-ire) My friend, when the blood has dried
My friend, instant alibi
You've seen me from every side
Still down for the ride
Ooh, my friend, you know why Who could take your place?
Who could take mine?
None could take your place
None could take mine
My friend, when the blood has dried
My friend (We stay safe together, we stay safe together)
Instant alibi (We stay safe together, escape death forever)
You've seen me from every side
Still down for the ride
Ooh, my friend, you know why We stay safe together
We stay safe together
We stay safe together
Escape death forever
Escape death forever
Escape death forever
We stay safe together
We stay safe together
We stay safe together
Escape death forever
Escape death forever
We stay safe together

Escape death forever
