My favorite song  
My favorite song  
Reminds me of the first time I went to space  
It was such a long journey

It took hours, days, years  
But when it was over...Oh, it takes me back  
That takes me back to the first time  
I stepped into space  
You were there!  
You were there with all my best friends! I remember!  
I remember the look on your face!  
The way you said, with your eyes.  
You said...And then I slipped out of the Sun's sphere of influence  
Nothing was happening  
It was so dizzying And then you took everything from me  
I was left here, a shell of my self  
I was left here to pick up the pieces  
And every piece was...la  
Give me love That's when you saved me  
At the last possible moment  
You brought you big hand out  
And scooped up my shit  
And took me home That day you gave a new faith  
In how people can save one another  
Instead of always putting out their hands  
To crush When you're out in space  
You feel so good  
Nanana nanana nanana nana When you're out in space  
You feel so good  
Nanana nanana nanana nana When you're out in space  
You feel so good  
Nanana nanana nanana nana When you're out in space  
You feel so good When you're out in space  
You feel so good  
Nanana nanana nanana nana When you're out in space  
You feel so good When you're out in space  
You feel so good  
Nanana nanana nanana nana When you're out in space  
You feel so good
