

Superman (feat. Glenn Lewis)

[Eric Roberson](#)

Dont talk your game young sister
Let it blow right in the wind
They want you to be clark kent young brother
But you're more like superman First of all dont appologize for the skin you're in
It shows just how deep we are, reminds us where we been
Sure we had some tough times,
I'm sure there's more to come
But Anything is possible your black, gifted and young
Spead your wings young lady
Show them who you are
Spead your wings little lady
Reach and touch the stars
Spead your wings little lady
Show them who you are
A queen of possibilities, the best to me by far
(Dont talk your game young sister)
Let it blow right in the wind
They want you to be clark kent young brother
But you r more like super man Physically, yea it is known
When it comes to black we're blessed
