

Make the Move

Chris James

I'd be honest babe, I still dance around it
Of the way it tasted when the summer started
I thought it never faced me but I'm all surrounded
But something I suppressed, that thing doOh youth
Been thinking about it too
Two lovers on the loose
It's all about the way we paced it
Why can't we not simplify
Just say it, go and try
Should we make
Should we make the move
Should we make
Should we make the move
Should we make
Should we make the move
Should we make
Should we make the move
Photos and the cameras never lie
There's nothing on the line that compromise
But I'm still afraid they'll never make it
Tryna cope with what I compromise
You always find the words to break the ice
It's not like there's much for us to complicate

Youth

Been thinking about it too
Two lovers on the loose
It's all about the way we paced it
Why can't we not simplify
Just say it, go and try
Should we make
Should we make the move, mh
Should we make
Should we make the move, yeah
Should we make
Should we make the move, yeah yeah
Should we make
Should we make the move
Come closer, it's time to do it right
With every set my legs are paralyzed I wanna be fine but God, I need you
When I try to pull through
Anyway, this feeling feels new

Anyway, this feeling feels new
