

# Beyond Electric Dreams

## Bad Religion

Here we go now  
No one here can show you where it is but I can point to a sign  
On the roof of the world without apparent design  
The frozen definition of a lunatic ambition to rise  
The air is dead, the future dim, dimension  
hard to find  
Upon a mountain encased in solar rays  
Beyond electric dreams of inarticulate passion plays  
Coming down a mountain  
Eons have a human reign  
The conversation of impassive planets  
Intercepted by a human being  
Ratiocination is a practicable way to derive  
An attitude of altitude authority by which to abide  
Or maybe a thoeophany of flaming creosote in disguise  
reality's dead, the future is still, the match is hard to find  
Up on a mountain encased in solar rays  
Beyond electric dreams of inarticulate passion plays  
Coming down a mountain  
Eons of a human reign  
The conversation of impassive planets  
Intercepted by a human being  
geographic co-worker in the crumbling geometry of night  
a torturing form that traces faceless theories  
Of a superhuman imagination in a patch of sand  
There were raptures guided with every intensity  
I'm only a visitor in an atom of atoms  
On a jutting red spattered synagogue of granite  
Imigrants crowded literally in space  
Disposure, demoral, giant  
Things in heaven work forever (live, live, live, live)  
let's go where the raptor goes  
Cause I'm melting in a cosmic glow  
We'll have a genuine terrestrial show  
On a mountain, on a mountain  
Let's scan the horizon clean  
Of any trace of a human schemes  
It's a terrestrial immoral gene  
On a mountain, on a mountain up on a mountain  
(let's go where the record goes)  
eons of a human reign  
(Cause I'm melting in a cosmic glow)  
The conversation of impassive planets  
(We'll have a genuine terrestrial show)  
Intercepted by the human being  
(On a mountain, on a mountain) up on a mountain  
(Let's scan the horizon clean)  
encased in solar rays  
(of any trace of a human schemes)

beyond electric dreams  
(It's a terrestrial immoral gene)  
on a mountain, on a mountain  
(On a mountain, on a mountain)up on a mountain  
(let's go where the record goes)  
eons of a human reign  
(Cause I'm melting in a cosmic glow)  
The conversation of impassive planets  
(We'll have a genuine terrestrial show)  
on a mountain, on a mountain  
(On a mountain, on a mountain)up on a mountain  
(Let's scan the horizon clean)  
encased in solar rays  
(of any trace of a human schemes)  
beyond electric dreams  
(It's a terrestrial immoral gene)  
on a mountain, on a mountain  
(On a mountain, on a mountain)up on a mountain  
(let's go where the record goes)  
eons of a human reign  
(Cause I'm melting in a cosmic glow)  
The conversation of impassive planets  
(We'll have a genuine terrestrial show)  
on a mountain
