

# Love Games (feat. Jeremih)

## Ashanti

Let's play a game  
Whatever start I kiss you right, you kiss me You kiss me there, I'll kiss you back  
Let's play a game  
You got my front, I got yo back  
You kiss me there, I'll kiss you back  
Let's play a game  
I kiss you there, you'll kiss me back  
Let's play a game  
I got yo front, you got...  
Say you're gonna kiss me when I kiss you right baby  
I ain't one of them girls that's scared (I can't)  
And I'mma make you feel like you've never felt before  
I'mma pull my hair back and give it to you one more See in life I don't like to play games  
But because it's you and I, I am here, I'm ready  
So give me one hit, two hits, three hits, homerun  
Put your hands all over me, said that it's not funny You kiss me there, I'll kiss you back  
Let's play a game  
You got my front, I got yo back  
You kiss me there, I'll kiss you back  
Let's play a game  
I kiss you there, you'll kiss me back  
Let's play a game  
I got yo front, you got... You know I'm finna get you back, baby  
You can be head in charge  
I just think...  
Maybe we should play them games  
Hide and seek  
Might spin a little jiving  
We can take it low  
Yea, I let go off them dollas  
If you can take that low  
I just got an extra 5 yea, got you throwed up loose  
I dare you to drop em  
Girl we can skip the truth  
Oh when I'm kissin you there while you kissin me back  
Red light, green light, just like that  
Using my fingers like finger I win  
Switchin these positions like a twisted ending girl You kiss me there, I'll kiss you back  
(You kiss me there, I'll kiss you back)  
Let's play a game  
(Let's play a game)  
You got my front, I got yo back

(You got my front, I got yo back)  
You kiss me there, I'll kiss you back  
Let's play a game  
I kiss you there, you'll kiss me back  
Let's play a game  
I got yo front, you got... You got my front, I got yo back baby  
You got my front, I got yo back baby  
Ha, the way you arch yo back  
The way you lookin back at it man, I swear you ain't felt it like this
