

Play By Play

Autre Ne Veut

(Intro)

And I said baby

And I said baby

And I said baby

And I said baby

And I said baby, I'm all alone

I need you now

Come stay with me so that we can meet somehow

Said baby, your hold me down is my design

Come stay with me so we can be much higher(Verse)

I don't wanna be there tonight

You make me whole, you make me go

Make me harder than you

Wanna be the one that made me up

You made me love

Don't make me help and make me odder

And you don't wanna be like I'm the pain that

You never wanted be it

Fine, take that

(Bridge)

You wait for love, telling me to go, go, go

Don't ever leave me

You're feeling like you don't mind

Thinking that you want to go

Don't ever leave me

You're feeling like you don't mind

Thinking that you want to go

Don't ever leave me alone

And this is how you find

I'll make it and you'll know, know, know

Don't ever leave me

Never leave me out

Never leave me

Don't try to make me

(Chorus x6)

I just called you up to get that play by play by play by play

Don't ever leave me alone

I just called you up to get that play by play(Outro)

Don't ever, don't ever, don't ever leave me alone

Don't ever leave me, don't ever

Don't ever leave me

That play by play, play by play

Don't ever leave me alone
