

Shoot the Moon

Voodoo Glow Skulls

i can't stand this common shit
life's too fast for me
everyone's trying so hard to impress
what is the really meaning of humanity morals and values are based upon
your style of dress
money in your pocket will become chump change
if we don't make any progress success and fitness are the trend
of today
infomercials keep us all in touch
with modern technology
lets shoot the moon!
shoot the moon
let's shoot the moon
soon you will be shopping
without leaving your front fucking door
the cost of living is never going away
jobs are fading and poverty is on the rise lets shoot the moon!
shoot the moon
let's shoot the moon
