

Otherside (feat. Grabbitz)

MYRNE

[Verse 1: Grabbitz]

Take initiative

This body is in this soul

I can show you what the difference is

I've gotten to this point

All the while, I've been missing it

I'm basing all my moves

On one of those incidents

Where my heart strings were dissonant, yeah [Chorus: Grabbitz]

We could just stare and never touch at all

Let me come in past the old brick walls

And go through you

And go through you

And through the other side

And through the other side

[Verse 2: Grabbitz]

Are you listening?

The drum inside my chest

Is a mess, but I am fixing it

And I'm gonna pry that

Lock up the box yours is hidden in

So try to erase those days

You were stripped of your innocence

Where your heart strings were dissonant [Chorus: Grabbitz]

We could just stare and never touch at all

Let me come in past the old brick walls

And go through you

And go through you

And go through you

And go through you

And through the other side

And through the other side

And go through you

And through the other side

We could just stare and never touch at all

Let me come in past the old brick walls

And go through you

And go through you

And through the other side
