

# I Don't Wanna End the Night

## Prelow

We could walk or we could call a cab  
And you can bring anything that you could fit in your bag  
And we're out  
I walk in front and now I'm leading the pack  
And you're bringing up the rear cause you're taking a drag  
And we both  
We get there and there's no one alive  
But the guys in the corner starting making the eye  
So I say "let's get a drink at the bar downstairs"  
She said, "hey, I get a drink almost anywhere" I don't wanna end the night right now  
I don't wanna go to sleep  
I don't wanna be the first one down  
When it's just you and me Don't get it twisted now  
Let's find a place where nobody can see  
She said "did you forget we're in a big city?"  
No, no, well there's a light up in every room  
She said "yeah, but nobody's looking up at the moon"  
And we both get a little bit tired of that  
I get tired of that, I get tired of that  
She said "hey, well if you're tired then you need to crash"  
And I need to crash, I need to crash right now
