

The Greatest Generation

All That Remains

If you've been wondering
Just what is made of [?]
A generation unsolved My father' father
May God rest his soul
He told me something you should know You put your shoulder to the wind
I want the reverse
A generation I want
I want one of the greatest, tell me this At night we fade away
You know I want one to believe us
To leave us Remember what made us great
Remember what made us great
They talking shitty things
To all the wonders that you see
They did it all to us You put your shoulder to the wind
You shake your fingers to the bone I want the reverse
A generation I want
I want one of the greatest, tell me this At night we fade away
You know I want one to believe us
To leave us I am forever grateful
I am forever grateful
I'll make it great this way Remember what made us great
Remember what made us great Instrumental
Remember what made us great
Remember what made us great I want a generation
I want to believe us
To leave us I want a generation
I want to believe us
To leave us Remember what made us great
Remember what made us great
