

Love and Motion (feat. Christian Burns)

[Benny Benassi](#)

The glow I see, it's been following me
And it's brighter than before
It seems brighter than before
And you and me, we see perfectly
It seems lighter than before
So much brighter than before And I could be the only
One that you'd ever need
And you could be the only
Girl that I wait for 'Cause you've got me
And we've got noise
Do you believe in love?
1, 2, 3, 4 we've got love
And motion and motion and motion
The glow I see, it's been following me
And it's brighter than before
It seems brighter than before
And you and me, we hear perfectly
It seems louder than before
So much rounder than before And I could be the only
One that you'd ever need
And you could be the only
Girl that I wait for 'Cause you've got me
And we've got noise
Do you believe in love?
1, 2, 3, 4 we've got love
And motion and motion and motion
Did you walk across the line?
Did you shake it off your mind?
Did you ever think
That I would be the one
To bring you back? Did you cover up the sound
Of a million golden days?
When the sun comes up
We'll all be here together, it's okay And I could be the only
(Just think about everything)
One that you'd ever need
(Oh)
And you could be the only
(Just think about everything)
Girl that I wait for 'Cause you've got me
And we've got noise
Do you believe in love?

1, 2, 3, 4 we've got love
