

# You and I Tonight

## Faber Drive

Tonight a candle lights the room,  
Tonight it's only me and you,  
Your skin, like gravity  
Is pulling every part of me,  
I fall, you and I collide What if I stay forever?  
What if there's no goodbye?  
Frozen for a moment here in time,  
If you tell me the sky is falling,  
Or say that the stars collide,  
The only thing that matters in my life,  
Is you and I tonight  
Our eyes close the candle burns away,  
But I know the fire still remains  
This love is all we need  
We fit together perfectly,  
I fall, you and I collide What if I stay forever?  
What if there's no goodbye?  
Frozen for a moment here in time,  
If you tell me the sky is falling,  
We'll say that the stars collide,  
The only thing that matters in my life,  
Is you and I tonight I wanna see this through  
I wanna give it all to you Tonight a candle lights the room  
Tonight, it's only me and you, oh  
What if I stay forever?  
What if there's no goodbye?  
Frozen for a moment here in time,  
If you tell me the sky is falling,  
Or say that the stars collide,  
The only thing that matters in my life,  
Is you and I tonight  
Tell me the sky, forever  
Just you and I tonight  
What if I stay?  
Just you and I tonight
