

# Better

## Helmet

Get it right  
My last word sins  
I taste it now  
Omission wins For keeping down  
My better side I still ignore  
And try to hide So get out  
The easy word  
Will never slip  
I brought it down  
To take the lip  
Don't need to know  
Don't have to feel  
Your better side  
I had to steal Your better, you die better Write down the day, expend it  
Work it in again, death ends it
