

Blackstar Horizon

Kryptos

Shadows swallow the neon sun
In dark waves of cosmic night
Damnation of the crystal realm
Operation: kill the light Don't breathe a word
Don't you dare
Plunge now into certain death
A black voyage to the other side The megalith it calls
From depths beyond space and time
Crimson gods are watching you
Through spheres of endless eyes Graven portals to an unknown void
Dawn breaks over desolate realms
Red shift: obliteration
Face to face with the fallen star
Sentient moons crumble to dust
Dark matter annihilation
Spiral down, infinite darkness
Plummet into stellar hell Don't breathe a word
Don't you dare
Crimson gods are watching you
Through spheres of endless eyes The megalith it calls
From depths beyond space and time
Plunging into certain death
A black voyage to the other side Gaze upon the Promethean wall
Where madness calls and chaos reigns
Threshold infiltration
Behold! Dimension Adramelech
The megalith it calls
From depths beyond space and time
Crimson gods are watching you
Through spheres of endless eyes Blackstar horizon
At the edge of no return
Plunging into certain death
A black voyage to the other side
Its certain death
