

Supercharger

Machine Head

Electricity is pulsing
Through our veins a charge is racing
A chain reaction through the four of us
To you will make
The transformers begin converting into overdrive Power surge now exploding through
Energy, filling the ominous void within' you
No need to live your life in that gap
Got what you need right here on lightening tap, so Charge me, charge you
Charge us, charge through
Amplify, terrify
Supercharger electrifies
Getting under skin, we're like a rash
Spreading over your body
We are the itch you scratch
That doesn't seem to go away
Protons, neutrons, electrons
Synchronizing into one In sheer power all will pale
Heaviness of the Richter Scale
Forever crushing the competition in their tracks
100, 000 volts we blast, so Charge me, charge you
Charge us, charge through
Amplify, terrify
Supercharger electrifies Oh my fuckin' god! You're little sticks of dynamite
We're the fuse and we're the light
Electricity is pulsing
Through our veins a charge is racing
A chain reaction through the four of us
To you, has made
It's crystal clear we'll win this war
Destiny... victory Braveheart-mindset, full attack
Kamikaze, never look back
In this war, a victory is if you feel this too
You feed of us and we feed off you, so Charge me, charge you
Charge us, charge through
Amplify, terrify
Supercharger electrifies Charge me, charge you
Charge us, charge through
Supercharger
Supercharger
Supercharger
Supercharger.
